

Handle ESTAL

New frontiers
in Aluminium design

modern and elegant

young, delicate but strong

A new aluminium handle with a young modern style but elegant all the while, solid and slender, together with a soft comfortable grip, to provide a pleasant hold, for a refreshed refrigerator design.

shapely

This brand new handle in Coni Technic catalogue well mixes the concept of Aluminium design with the use of reinforced plastic materials in a balanced proportion of slender style and strength.

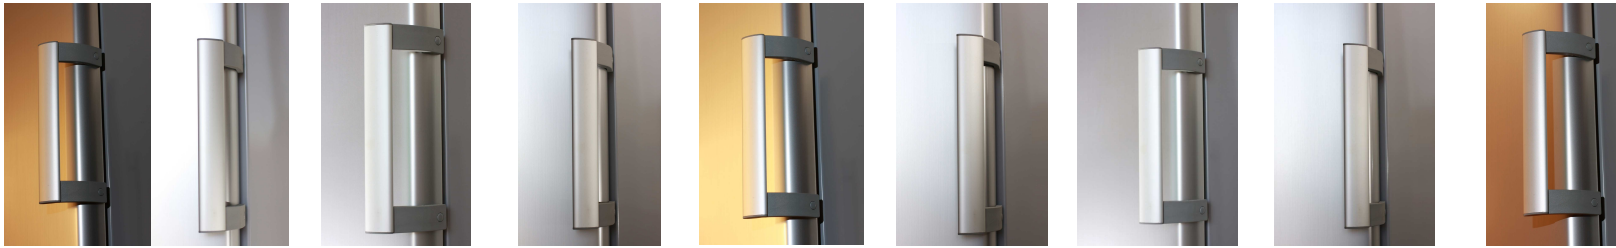

a smooth touch of colour

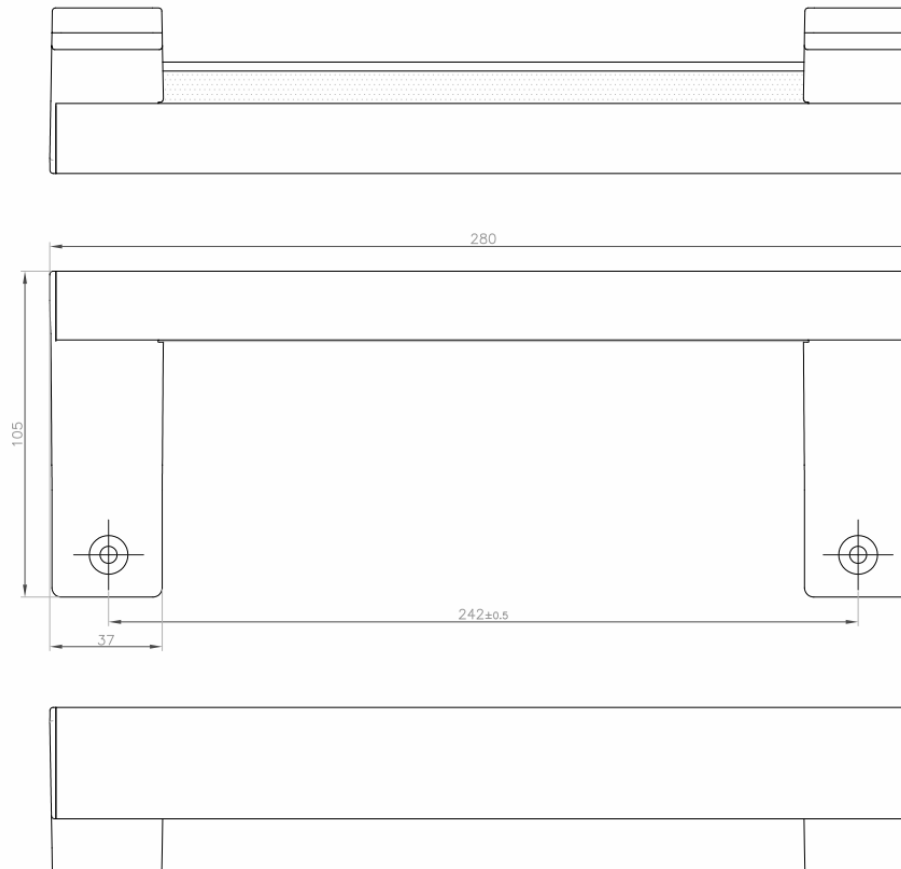

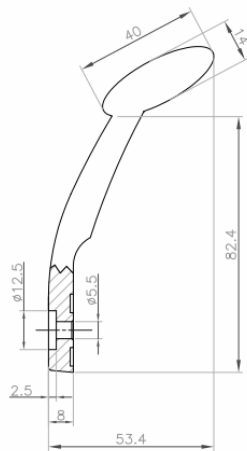

The back side insert, made of a proper softening material, contributes to a smooth grip while holding the handle, and gives the opportunity of a non-intrusive colour touch which may fit to each specific refrigerator style.
